Category	Description	Credits	Contribution of Amorim Cork Flooring Products	Available Points
Materials and Resources	Its objective is to reduce the energy used and other impacts related with the extraction, processing, transport, maintenance and disposal of construction materials.	Building Product Disclosure and Optimization - Environmental Product Declarations	Since the products have Environmental Product Declaration (EPD), they contribute to the direct obtainment of points. To get one point it is necessary to use at least 20 different products with EPD. For 2 points, it is necessary to use 40 products with EPD.	1-2*
		Indoor Air Quality Assessment	Since the products have reduced volatile organic compounds (VOCs) emissions and other pollutants they have an indirect contribution to points.	1-2
Indoor Environmental Quality	Its objective is to provide a good indoor air quality, so as to protect the health and comfort of all the building's users. It allows to improve productivity, it enhances the building value and reduces the owner's responsibilities.	Low-Emitting Materials	Since the products have reduced volatile organic compounds (VOCs) emissions and other pollutants, proven by GREENGUARD certification, they have a direct contribution to points.	1-3
		Indoor Air Quality Assessment	Since the products have reduced volatile organic compounds (VOCs) emissions and other pollutants they have an indirect contribution to points.	1-2
Total Maximum Credits Possible				7

*except Wood Pro (EPD in progress)
